

<u>Studies</u>

Adherence to Suicide Reporting Guidelines by News Shared on a Social Networking Platform The Proceedings of the National Academy of Sciences (PNAS) has published a <u>study</u> evaluating news shared on Facebook for adherence to the <u>suicide reporting recommendations</u>.

<u>Risk and protective factors for childhood suicide: thoughts, plans and behaviours</u> This blog post from the Mental Elf summarises a cohort study that explores the risk and protective factors for childhood suicidal thoughts and behaviours.

Implementation Determinants and Outcomes of a Technology-Enabled Service Targeting Suicide Risk in High Schools: Mixed Methods Study Innovative suicide prevention strategies that rely on passive data collection in the school context are a promising and appealing idea. Usability testing identified key issues for revision to facilitate widespread implementation.

<u>Guidance</u>

<u>Supporting Survivors of Suicide Loss: A Guide for Funeral Directors</u> This guide provides critical information and practical advice to help funeral directors better serve people who are bereaved by a suicide loss. It also suggests useful resources for suicide loss survivors.

<u>Campaign</u>

<u>Don't Mask How You Really Feel</u> Papyrus have launched our new campaign urging people to talk if they're experiencing thoughts of suicide. The campaign is asking people not to mask their feelings when it comes to experiencing thoughts of suicide.
