Report

[The treatment of autistic people and people with learning disabilities](#) This latest parliamentary report looks at three key areas: community and support structures to enable autistic people and people with learning disabilities live independent, free & fulfilled lives, reforming inpatient facilities, including examining the use of restrictive practices and the wellbeing of and accountability for autistic people and people with learning disabilities.

Resources

[New resources launched to smooth transition to adult healthcare services](#)

Mencap and Bradford People First have launched a new guide, [Hospital care for young people with a learning disability](#), and video which aim to provide people and their families with the knowledge and tools they need to help them get the right support and healthcare during the transition into adult services.

Study

[Autistic children's sleep problems linked to behavioral regulation issues](#) Sleep problems in young children with autism are associated with behavioral regulation difficulties later in childhood, according to a new longitudinal study.
