Systematic Reviews

[Suicide rates amongst individuals from ethnic minority backgrounds: A systematic review and meta-analysis](#)

The homogeneous grouping of individuals from ethnic minority backgrounds is inappropriate. To support suicide prevention in marginalised groups, further exploration of important contextual differences in risk is required.

[Quantitative Methods to Detect Suicide and Self-Harm Clusters: A Systematic Review](#)

The synthesized results of this systematic review demonstrate advances made in epidemiological cluster detection, which is relevant to suicide and self-harm data, within the forty-five-year period since statistical investigations into clusters of suicide and self-harm were first published. Most notably, the evolution of open-source GIS software, has effectively contributed to point cluster detection by means of geospatial probabilistic modelling. Mass suicide cluster detection traditionally employs a time-series regression analysis to verify temporal clustering within a population; however, the use of retrospective aggregated data in these studies compromises the accuracy and efficiency of cluster detection investigations.

Studies

[The moderating role of sexual minority status in the associations of the experience and tolerance of shame-related emotions to suicide risk](#)

Results revealed significant positive associations between self-disgust and suicide risk for sexual minority and heterosexual participants, although the magnitude was greater for sexual minority participants.

[Men, suicide, and family and interpersonal violence: A mixed methods exploratory study](#)

This study contributes to understanding of gender, violence, and suicide, highlighting the socio-demographic and situational factors in which family and intimate partner violence and suicide occurs, and the intended outcomes of men's actions.

[Suicide Prevention Film- League Managers Association and Andy Burnham](#)

In March 2021, The League Managers Association (LMA) teamed up with the Mayor of Greater Manchester, Andy Burnham to launch a new partnership supporting the Shining a Light on Suicide campaign, which aims to help prevent suicide. This new suicide prevention film features Gareth Southgate, Andy Burnham, all 20 Premier League Managers, as well as managers of teams from across all professional football leagues. This film aims to use the managers influence to encourage everyone to undertake the free Zero Suicide Alliance suicide prevention training to help save lives.
